13TH WEEKLY REPORT OF AISB FROM 19TH JUL, 2021 TO 23RD JUL, 2021

Dear Parents,

We know that the world is on the path of **E-Learning and Digital era**.

The situation demands that adaptability is the only way of survival.

When the world is going through the worst crisis and the schools are closed for the students, our school started the new academic session without disturbing the schedule of the Annual Planner through **Virtual Classes** for all standards (**Pre-primary to XII**) which was highly appreciated and supported by the parents and students.

Our students are learning a lot through academic and co-curricular activities conducted online with full enthusiasm.

We are pleased to share with you the **Weekly Report** of online classes from **19th Jul, 2021 to 23rd Jul, 2021** of **AMICUS INTERNATIONAL SCHOOL, BHARUCH**.

PRE-SCHOOL (Main Campus, SA Campus, RK Campus)

FUN WITH SCIENCE

Introducing children to science at a young age assists in their brain development. Even toddlers can do science experiments. By using materials that children like to play with, or things which are usually available at home. It helps them to grow big ideas and understand fundamental concepts. Our AIPS science activities do more than offer up facts. It also values the role of wonder, error to make sense and to find out things about the world. While some concepts may be too complex for children to grasp just yet, science for preschoolers encourages them to grow their knowledge from one experiment to the next. It helps them to recognise patterns and keeps your child's curiosity alive.

We did the **"Go Away Germs experiment"** along with our toddlers on 19/07/21 (Monday). All little toddlers were ecstatic & performed the experiments wonderfully.

CODING

People are smarter than computers. We decide what actions we want a computer to carry out, and then we communicate in a language the computer understands in order to complete tasks. We call this language "code", and we instruct the computer using specific commands.

Sequence is the order that commands are executed by a computer. It allows us to carry out tasks that have multiple steps. In programming, sequence is a basic algorithm: A set of logical steps carried out in order.

We included the **Rolly Polly Rhyme & Teddy Bear Rhyme** (on 23/07/21 Friday), to make toddlers understand the sequencing in a fun way. Children have followed all the commands given by the teacher & did the actions as per the command.

The above picture depicts how Little toddlers start crawling on knees till they start walking on their feet. Step by step growth of a child can also be known as **SEQUENCING**.
