## SEED GERMINATION & NURTURING PLANTS

On the **WORLD EARTH DAY**, i.e on 22/04/2026, AIS had organised Seed Germination Activity for our little munchkins.

The seed germination activity was a joyful and meaningful experience for our toddlers. The children planted tiny seeds in soil, gently watered them, and placed them in sunlight. Through this hands-on activity, they observed how a small seed slowly grows into a plant.

This activity also supported **Social and Emotional Learning (SEL)** by helping children understand care and responsibility. As they nurtured their plants, they learned patience, kindness, and the importance of taking care of living things. The toddlers felt happy and proud watching their plants grow each day.

It was a beautiful way to connect children with nature while encouraging empathy and a sense of responsibility.
